

Hyundai Building

NEW SOUTH WALES AUSTRALIA

CTA puts metal to the Hyundai pedal

Hyundai has produced almost four million cars since they began production in the late 1960s. They are credited with being the fastest growing car company in the world. Indeed, since starting their Australian journey in 1986, over 700,000 of their vehicles have hit the road.

Part of Hyundai's success rests in strategic future planning, and so when they relocated to their new Sydney head office in Macquarie Park, they made sure a like-minded company was there with them: CTA Australia Pty Ltd (CTA).

“It comes as no surprise that Hyundai chose to be associated with CTA, the leading Australian manufacturer of access and mobility products.”

CTA's tactiles complement and enhance Hyundai's visionary, eco-friendly building. Designed to accommodate the company's projected long term growth over the next twenty years, the new state-of-the-art facility is 4.5 Green Star Certified Rated. It features exterior sun shades and awnings, solar-powered hot

water, solar-rated glass, plus grey and storm water tanks.

And, thanks to the addition of CTA's attractive SureSteel tactiles with stepped sideface profiles and concentric ring top surface, Hyundai's new facility also complies with the Building Code of Australia. In fact, CTA SureSteel makes certain that the new Hyundai head office now meets all aspects of the Australian Standard: Design for Access and Mobility (AS1429.4:2002), and therefore also conforms to the Disability Discrimination Act (1992).

It comes as no surprise that Hyundai chose to be associated with CTA, the leading Australian manufacturer of access and mobility products. They are currently the only car manufacturer in Australia to offer a five year warranty, so they clearly take no chances when it comes to quality products they can trust.

Like Hyundai, CTA are serious about quality; SureSteel tactiles are manufactured from one solid piece of 316 stainless steel, thereby ensuring the tactile head will never detach from the anchoring sprigot. So, like Hyundai, CTA is in for the long haul;

they design their products to last, making them the ultimate in cost competitive performance.

Like Hyundai, CTA are also concerned with safety; SureSteel Tactiles have an anti-slip safety rating of R13, the highest in the industry, as tested by the CSIRO.

Like Hyundai, CTA leads the market in quality products you can rely upon.

the only company in
australia with every
tactile solution
